1. On 22 September 1951, the Luftnachrichten Kaserne, Bernau (N 53/Z 96), was only partially occupied by troops who wore red-bordered black epaulets, including some with artillery insignia. About 20 soldiers were seen receiving theoretical instruction on an artillery piece, apparently an AT gun. Fresh tank treads were seen at the barracks gate on Wandlitzer Chaussee.

2. Prior to 22 September, the barracks installations in Perleberg (N 54/T 70) were occupied by only rear details, and the troops from the installations were still at the Schweinrich troop training grounds. An interpreter said that the troops were expected to return in the middle of October, and that the barracks installations would be occupied more heavily than before. Engineer troops were allegedly to be among the troops expected to return to the post. (2) Gun fire was repeatedly heard from the direction of Hagenow during the days and nights between 16 and 22 September. (3)
